

The Movement

Secular entertainment, for the most part, has become so polluted that some of their audiences are looking for alternatives.

Socially conscious and religious music has begun to gain market shares within the urban music industry.

Christian films are beginning to see commercial success.

The Christian comic book and video game industries remain virtually untapped, with only a few players in the mix.

There is a market for Christian entertainment; and Heaven's Disciples is here to fill in that gap.

Christian urban entertainment is what the audience has been thirsting for.

Heaven's Disciples® is a multimedia-based company featuring Christian urban entertainment in music, comics, video games, machinima films, and books.
